

**15 Apr 2024**

**Objective:** Conduct a targeted literature search to gather primary sources.

**Tasks Completed:**

1. Collected additional research articles to expand the data pool.
2. Initiated the creation of the first draft based on the outlined structure.
3. Began drafting the Introduction section and analyzed relevant literature.

**Next Steps:**

1. Continue developing the Introduction section for the draft. It will be called: Interconnected Pathways: A Comprehensive Review of Insulin and Dopamine Signaling in the Brain and Their Implications for Psychiatric Disorders

**Conclusion:** Progress has been made towards creating the first draft. Although it may initially lack organization and comprehensive coverage of key concepts, this marks an important starting point in the development process.
