

22 Apr 2024

Objective: Complete the Introduction section or develop a comprehensive and detailed outline for it.

Tasks Completed:

1. Finalized the Introduction section, following a questions-based outline that explains Insulin, Dopamine, their interaction, and additional relevant topics.
2. Initiated work on the section discussing the molecular aspects of the interaction between Insulin and Dopamine.

Next Steps:

1. Continue developing the Molecular Mechanisms section.

Conclusion: The Introduction section has been completed, providing a thorough foundation for the review. Work has now commenced on the Molecular Mechanisms section.
